### Courses Taught

**DANC 360 – Lighting Design for Dance** – A study in the art of lighting design as it evolves from the choreographer/designer collaboration. The basic techniques of drafting, use of color, and composition of space related to light and movement will be explored. This course focuses on the fundamentals of lighting design and how they relate to dance. Students go through the creative process from the first viewing of choreography to the development of lighting ideas, the production of a light plot with associated paperwork (including focus charts), and the creation of light cues. The history of lighting design is explored both through its pioneers and by looking back at lighting designs for specific dance companies. Additionally, the relationship between light and sound is investigated.

**DANC 260 – Dance Production Workshop** – This course is an introduction to the basic principles of backstage dance production and lighting design. The emphasis is threefold:

- Familiarization with the vocabulary and tools of technical production and design
- Familiarization with the backstage technical workings of a production
- The design (primarily lighting) and production process

**THEA 225 – Electricity for the Stage** – A study of the properties and basic principles of electricity as they relate to the utilization of light on the stage. The objective of this course is designed to expand one's basic knowledge of electricity and how it relates to stage lighting for the theatre. All aspects of stage electrics will be covered extensively in this course including simple wiring through complex data systems required for the theatre.

**ACADEMIC EXPERIENCE continued**

**THEA 229 – Intro to Lighting Design** – A study of issues concerning the properties of light and electricity as they relate to theatre design, composition and color. The objective of this course is designed to help better understand the beginning aspects of lighting design for the stage. All aspects of lighting design and basic stage electrics will be covered in this course. Lectures will be geared towards fully understanding the beginning stages of the lighting design process for live performance.

**THEA 429 – Advanced Lighting Design** – Advanced study of the methods, problems and techniques of lighting design for the student who plans to enter the field professionally. The objective of this course is designed to expand one's knowledge of advanced stage lighting for the theatre. Advanced study of lighting design – incorporating increasingly difficult texts and facilities, alternative venues, and production styles. Further exploration of the process of lighting design for theatre and other related events. Projects focus intensely on the conceptual and collaborative process.

**Guest Lectures – Virginia Commonwealth University**

**DANC 490 – Senior Project Capstone** – ‘Working with the Lighting Designer’

**THEA 225 – Electricity for the Stage** – ‘Light Board Training’

**THEA 229 – Introduction to Lighting Design** – ‘Equipment’, ‘Light Board Training’, ‘Angle and Direction’, ‘Instrument Types and Purposes’

**THEA 429 – Advanced Lighting Design** – ‘Cueing Session’, ‘Final Project Demonstration’, ‘Color Theory’, ‘Equipment’, ‘Angle and Direction’, ‘Lighting for Dance’, ‘Lighting Musicals’

**THEA 440 – Projects – Lighting Design** – ‘Moving Lights for Dance’, ‘Moving Lights for Non-Theatre’

**THEA 492 – Independent Study** – ‘Interview Questions’, ‘How to Track Moving Lights’

**2009-2012 – Production Manager/Lighting Designer**

**Perry-Mansfield Performing Arts School and Camp – Steamboat Springs, CO**

**Courses Taught**

**Stage Production** – Team-taught class providing lectures and hands-on experience in all areas of theatrical production including scenery, lighting, sound, costumes, props, set construction, and painting.

**2007 – Teaching Fellow – Department of Theater Arts  
Brandeis University – Waltham, MA****Courses Taught**

**THA 52B – Fundamentals of Lighting** – A hands-on investigation of the hardware and software of lighting design, the functions and use of stage lighting equipment, computer lighting consoles, design software, and production paperwork. Basic electrical theory and safety considerations concerning rigging, focusing, and power distribution will also be discussed. This course is designed to be an introduction to theatrical lighting design. It will endeavor to give the student an understanding of what lighting design is (in its many forms) and how a lighting designer works. Lighting in the theatre requires an understanding of the available technology and the creative process that combine together to create the design. Thus, this course explores both the mechanical and artistic sides of the lighting design process.
